# **1 Description**

A platform to meet up people from different places. The website basically provides mates or partner for travelling. Anyone can post their date and tour plan in the website and other's can search for tour by date and if their is any entry they can contact with each other and go together in that tour plan. This project also provides tour guide and local transports so that people can also earn money from that. This will also give some discount on next tour depending on previous tours point. The point will be given to a traveller by completing some tasks.

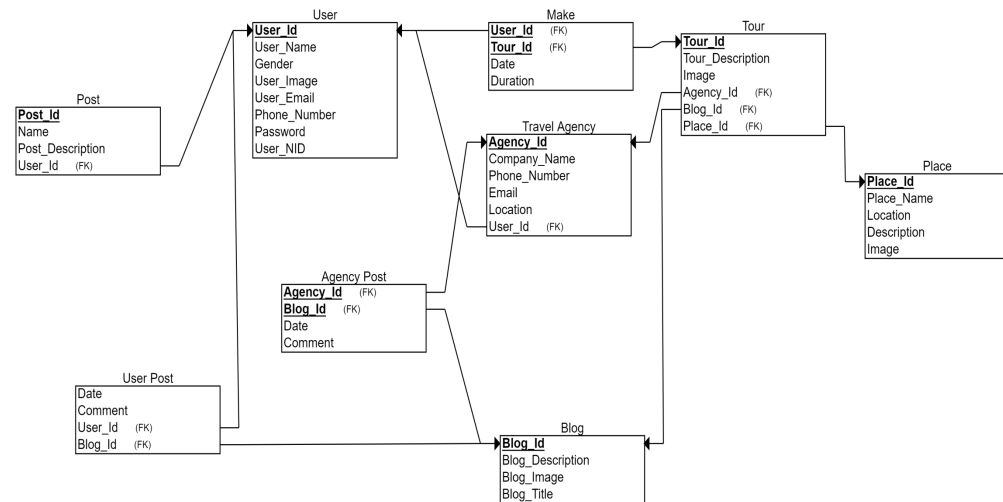

## 2 Novelty

What is new about this project?

- Finding Mates for Tour
- Discount on next trip or tour according to previous one.

### 3 Schema Diagram

Schema Diagram of your project

## 4 Tools Used

Table 1: Tools used for the project

<b>Tool</b>	<b>Purpose</b>
Xampp	For creating a localhost
phpMyAdmin	For hosting the database
Sublime Text	BackEnd and FrontEnd coding

## 5 Challenges Faced

These are the challenges we faced while doing the project:

- **Challenge 1:** During Session related work.
- **Challenge 2:** During Making the website dynamic.

## 6 Current Applications

Applications of our project is as follows:

- **Application 1:** Travellers Can post for travel events.
- **Application 2:** Travellers Can search for travel events.

## **7 Future Work**

- Will Work with security issue of the Travellers.
- Will integrate payment System( Visa,Master Card, Bikash ).
